

1. RENDERX

RenderX's patented technology is used by hundreds of organizations worldwide in the financial, consumer, insurance, government, manufacturing, transportation and pharmaceutical sectors to deliver dynamic documents in high volume to their customers, partners and employees. Committed to open standards and quality software components, RenderX helps companies to achieve efficiency, cost savings and quick return on investment.

RenderX provides standalone software products as well as server and desktop components that can be integrated into larger business solutions, all based on XEP. RenderX supports content in multiple languages and any level of layout complexity. The publishing engine arranges and formats text, tables, graphics, and images to generate professional, typeset-quality print products and enhanced electronic products for distribution with advanced features such as interactive links, bookmarks and electronic security.

RenderX offers all its software on a trial basis so that our prospects can easily see why thousands of customers have selected XEP to meet their needs.
